

HDMI Cable Tester with Carrying Case

MODEL NUMBER: **T040-001-HDMI**

HDMI signal tester quickly detects short circuits and crossed connections in HDMI and Mini HDMI cables up to 164 ft.

Features

HDMI Signal Tester: An Essential Tool for A/V Cable Installers

Avoid the problems and costly troubleshooting caused by a bad HDMI cable. This HDMI tester allows you to quickly and accurately verify HDMI and Mini HDMI cables with Type A-A, A-C or C-C connectors before installing them behind walls and in other tough-to-reach places. It's recommended for installers of digital signage applications and home theater systems who need to verify straight or crossed connections and open or short circuits.

Features 2 Adjustable Test Modes: Continuity and Sweep

Quickly validating whether a faulty HDMI cable is the issue in a malfunctioning application can save you time, trouble and money, as can detecting a faulty cable before you install it. The T040-001-HDMI flips from sync testing (Continuity) to step-by-step testing (Sweep) at the touch of a switch. It displays a 19 pin-to-pin wire map and shield connection status to ensure mapping continuity and proper configuration. The HDMI tester is compatible with HDMI versions 1.0 through 2.1 and cable lengths up to 164 feet (50 meters).

Easy to Store in Your Toolbox and Take to the Job Site

This HDMI signal tester consists of a main tester unit and a removable remote identifier that are secured in a protective carrying case when not in use. The tester units are powered by a standard 9-volt battery (not included). To test a cable that has already been installed, separate the two units and connect them to each end of the cable.

One-Year Warranty

The T040-001-HDMI is backed by a one-year warranty, ensuring reliability and performance.

Highlights

- Verifies HDMI and Mini HDMI cables with A-A, A-C or C-C connections rapidly
- Includes main and remote units for testing installed and uninstalled cabling
- Switches between Continuity and Sweep test modes at the touch of a switch
- Widely compatible with HDMI 1.0 to 2.1 cables up to 164 ft. (50 m)
- Protective carrying case fits in toolbox for use at cable installation sites

Applications

- Verify the performance of HDMI cables in digital signage applications in commercial spaces
- Test for short circuits and crossed connections during home theater or office audiovisual setups
- Locate a faulty HDMI or Mini HDMI cable in an installation

Package Includes

- Main tester
- Remote identifier
- Carrying case
- Owner's manual
